

commitment

Committed to You, Our Customer

Each customer and property we serve has unique needs. We specialize in meeting those needs by listening to you, getting to know you and your preferences, and then training our staff to accommodate your requests. Our goal is to exceed your expectations and earn your complete satisfaction. We take great pride in the relationships we have made with our clients.

Committed to Providing More Time for You to Enjoy

We perform comprehensive and customized seasonal and year-round services designed to fit your specific needs. Your lawn and landscape is meant to be enjoyed, so relax while we enhance its natural beauty. You deserve to see beautiful results and delight in the benefits of our service all season long. Plus, you'll have more time to spend doing the things you love.

Committed to Service

We're driven by the desire to provide you with a beautiful property, a well-functioning landscape and/or irrigation system, and outstanding customer care. Our experienced and professional team of office personnel, licensed applicators, technicians, and plumbers are committed to it. We take great pride in training our staff to be efficient without sacrificing customer service or compromising the excellence you seek on every job, every time.

Committed to the Industry

As members of PLANET (Professional Landcare Network), MNLA (Minnesota Nursery and Landscape Association), WTA (Wisconsin Turfgrass Association) and the Irrigation Association, we always stay current on new techniques, product advances, and education within the industry. Most companies work to maintain the status quo. We reach beyond that, providing you with the latest in technological advances in our industry. We employ many degreed, licensed, and certified staff in Agriculture Sciences, Horticulture, Turfgrass Management, Landscape Design & Installation, Plumbing, and more.

Committed to the Environment

We are stewards of our environment. Though it is our goal to make things green, we are committed to working together with our clients to protect our earth. We utilize the best pest management practices, tight and accurate routing systems, recycling strategies, and eco-friendly landscape and irrigation technologies. We are on the greening edge of an industry that will promote change to strengthen the sustainability of our habitats and communities.

promise

We're your
"One Stop" for
all of your outdoor
maintenance needs.

At the Greenskeepers and Greener Grass Systems, Inc., we're working together to keep the promise of beautiful grounds and extraordinary customer service.

We are the FINEST lawn care, maintenance, landscape, and irrigation company in the greater St. Croix River Valley, including the Eastern Twin Cities Metro Area and Western Wisconsin. We accomplish this by our commitment to consistently providing outstanding service and products, and by satisfying every customer we service or come into contact with. Our businesses combined have over 45 years of experience in the green industry. You can count on us to deliver consistent results for years to come.

results

Lawn & Specialty Services

Other prescriptive services are available.

Mowing Services- We don't just mow, we manicure your lawn. Our technicians will take the time to properly cut, trim, and blow off your property. We use mulch cutting equipment to "Grass-Cycle" and return vital nutrients to the soil. Bagged mowing service is available.

Our **Premium** package consists of mowing services performed as often as needed, sometimes twice per week during periods of heavy growth. It's the perfect choice for backyard enjoyment by providing a pristine look and an ideal cut all season long. The **Standard** package provides consistent, predictable mowing service performed once per week. As an extra bonus, the **Shrub Bed Weed Control Program** is FREE with our **Premium** or **Standard** mowing packages. We also offer bi-weekly and per time mowing service upon special request, though scheduling and availability may vary.

Shrub Bed Weed Control Package- Our 3-step program keeps your shrub beds looking great by controlling weeds throughout the season. A pre-emergent broadleaf and grassy weed control will be applied to your mulch and rock beds in early spring. Then two additional visits using a post-emergent treatment will be done between June & September. Hand weeding services are available.

Lawn Cleanups & Raking- Our **Spring Cleanup** includes spring-tooth raking to remove excess thatch, shrub bed blowout, and disposal of debris. Our **Raking Only** service does not include the "extras" like our **Spring Cleanup**. Remember, complete removal of thatch is not healthy or beneficial for your lawn. The thatch layer helps to retain moisture and allows oxygen and nutrients to be returned to the soil. Our **Fall Cleanup Services** include leaf removal from your lawn done once or multiple times, whichever you prefer. Your shrub beds will be blown out on the final visit. Perennial plant care and pruning can be added to any cleanup per your request. Spring and Fall are beautiful, but busy times of the year. Let us do the work while you enjoy the change of seasons!

Power Edging- Freshen up your concrete areas such as sidewalks and driveways by removing excess turf growth. Give your lawn the "edge" with a clean look and great curb appeal!

Gypsum & Lime Applications- **Gypsum** is used primarily as a salt or "dog spot" neutralizer and can also help to loosen heavy, clay soils. **Lime** naturally neutralizes the acid in your soil and improves the color and density of your lawn. **Lime** can also aid absorption of key nutrients your lawn needs to naturally reduce thatch buildup and fight off disease.

Core Aeration- Normally performed in the fall, but also available in the spring, aerating dramatically relieves soil compaction while controlling thatch buildup. It allows air and nutrients to reach the turf's root system. This process also creates growth pockets for new roots. Promoting healthy roots enables the turf to reach water and other nutrients deep in the soil. Over time, this process will help your lawn become more resistant to drought, disease, and heat stress.

Pruning- The scope of each pruning project will be determined by our technicians and the property owner. Our qualified crew will complete these services to industry standards or your indicated personal preferences.

Deluxe Overseeding Service- Rejuvenate your lawn without starting over! Help your lawn recover from drought stress and achieve optimum health with this intensive lawn renovation combination of **Double Pass Core Aeration, Raking, Starter Fertilizer & Broadcast Seeding**. Don't forget that watering the lawn is a **MUST** with this combo of services, so it pairs perfectly with a new lawn sprinkler system installation!

Grub Control- This application can help to eliminate grubs which attack the root system of the lawn, causing weakness & disease. Grubs can also be a food source for moles. **Grub Control is not fool proof and should not be considered a cure for a mole problem.** Different treatment options may be required, such as our **Mole Patrol Service**.

Mole Patrol Service- Our chemical-free trapping service consists of an initial visit to set traps, and additional visits to clean out, reset, and remove traps (3 visit minimum). This service has proven to be the most effective method of minimizing damage from these nuisance pests.

Tree & Shrub Care- Give your trees and shrubs a healthy meal to strengthen their overall health and vigor. We offer Deep Root Fertilization for trees and shrubs. Insecticide treatments are also available to protect from leaf miners, borers, and Japanese beetles.

Holiday Lighting & Snow Removal - Check out our winter services, too! More info is available on our website.

Lawn Care Programs

Our licensed and certified technicians will monitor the overall lawn health with each fertilizer & weed control application. Individual applications are available with any program. However, we recommend the full program for optimum results and value.

Granular Program- Our Granular Program uses a slow-release, granular fertilizer for deep green color. Liquid weed control is used as needed to control broadleaf weeds. Our **Premium** package includes all 5 applications during the growing season for complete, effective, and balanced lawn health from spring to fall with outstanding results. Pre-emergent crabgrass control is included in the first application of the season. You'll receive **Free Service Calls** with the **Premium** or **Standard** package. *It will be greener on YOUR side of the fence!*

Liquid Program- Our Liquid program consists of liquid fertilizer and broadleaf weed control applied in one easy step. Our **Premium** package includes all 5 applications during the growing season for complete, effective, and balanced lawn health from spring to fall with consistent results. Pre-emergent crabgrass control is included in the first application of the season. **Free Service Calls** are included with the **Premium** or **Standard** package. *This is a great option for the budget-minded lawn lover!*

Organic Program- This program requires 4 applications to be most effective. Corn gluten, kelp, seaweed extract, microbial soil conditioners, soy, and feather meal are just a few of the nutrients that will work to make your lawn green. *This program is not a weed-free option, but an organic alternative for a naturally green lawn!*

Landscaping Design & Installation Services

Let our professional team make your landscape dreams a reality. We take pride in providing beautiful designs that give consideration to future maintenance, care, and sustainability to keep your landscape looking great for years to come! Dramatic changes can be seen with even the slightest landscape improvements. Let us help you transform your backyard into a paradise that all can enjoy.

A complete list of our landscape services can be found online: www.TheGreenskeepers.com

Irrigation Installation

Our irrigation systems are designed to suit your needs. We provide you with flexibility to water each particular area with ease and to conserve water with the latest environmentally-friendly technology. An irrigation system adds to the value of your property, while enhancing the beauty and overall health of your lawn or landscape.

Irrigation Maintenance & Repair Services

We can maintain and repair any type of system no matter who did the installation! We stock parts for Rainbird, Toro, Hunter, and more. We also offer service packages to take the hassle out of your irrigation maintenance needs and the seasonal scheduling of your services. Our **Premium Maintenance** package consists of a **Spring Startup, Fall Blow Out**, and one **Mid-Season Checkup**. Our **Standard Maintenance** package and per time maintenance and repair options are also available. With skilled technicians and licensed plumbers, we'll put your mind at ease and have your system running smoothly in no time.
